

Elements of Design Unit Objectives

By the end of this unit, students will be able to...

- Summarize why the elements of design are important to landscape design.
- Summarize the meaning of each of the following: line, form, space, color, texture, and value.
- Identify key characteristics that comprise line, form, space, color, texture, and value.
- Identify line, form, space, color, texture, and value for given descriptions or examples.
- Pick out examples of line, form, space, color, texture, and value within photos of designed landscapes.
